Tile Manufacturer in Morbi: Why Orkay Tiles Is Your Go-To Choice

Made in Morbi, Recognized Nationwide; What You Get with Orkay

At Orkay Tiles, our commitment goes beyond producing tiles; it extends to creating spaces that meet your needs. Located in Morbi, Gujarat, Orkay Tiles has been manufacturing high-quality tiles for retailers, dealers, and developers throughout India since 1996. No matter if you are setting up a new store or updating your current inventory, we provide you with tiles that will attract your clients and keep them coming back.

Why Choose Orkay as Your Manufacturing Partner

The success of your retail or distribution business is directly related to the products you stock. These are some features that Orkay provides you with as a manufacturer:

Manufacturing Expertise in Latest Technologies: Orkay Tiles' manufacturing unit in Morbi is equipped with advanced kiln technology and precise digital printing technology lines. Our factory ensures consistent dimensional accuracy, surface quality, and finish precision in all our tiles, regardless of whether it is a basic ceramic wall tile or an elaborate porcelain slab.

Strict Quality Checks: All tiles shipped from Orkay are subject to strict quality controls on the part of Orkay, including calibration sorting, shading, grade assessment, and dimensional tolerance testing. This results in fewer returns, complaints, and installation problems for the dealers, ensuring your profitability and relationship with customers.

Environmentally Friendly Packaging: Orkay tiles are individually packaged in boxes that are specially designed to be environmentally friendly as well as ensure no damage during shipping. This means a reduction in the amount of broken tiles during shipping, a definite benefit when dealing with large orders as a dealer.

International Standards: Even for a Dealer Operating at Home, the same quality control that ensures that a company meets the demands of buyers from over 40 countries is applicable at home. In other words, as a dealer, you deal with products that have met international standards.

Orkay's Product Range: One Manufacturer, Every Tile Needs

One of the strongest reasons retailers and dealers choose Orkay is the sheer completeness of our product portfolio. You do not need multiple suppliers when you have Orkay.

Ceramic Wall Tiles — Decorative wall tiles in glossy and matt finishes, suited for bathrooms, kitchens, and living spaces.

Digital Porcelain Tiles — High-density tiles with high-resolution printed designs, offering low porosity and superior surface strength.

Glazed Vitrified Tiles (GVT) — Wide range of colours and finishes with a hard, glass-like surface, ideal for both residential and commercial floors.

Double-Charged Vitrified Tiles (DCT) — Two layers of pigment pressed before firing, creating deeper, richer designs that do not fade or wear off with abrasion.

Nano Vitrified Tiles — Advanced nano-coating for hydrophobic, stain-resistant surfaces — highly recommended for commercial spaces like restaurants, hospitals, and offices.

Wood-Look Plank Tiles — Realistic wood grain aesthetics with tile's durability and moisture resistance, a fast-growing preference among urban Indian homeowners.

Countertop Tiles — Heat-resistant and scratch-resistant engineered tiles for kitchen and bath counters, a premium alternative to natural stone.

Outdoor and Anti-Skid Tiles — Weatherproof, textured tiles built for terraces, garden paths, pool decks, and public plazas.

Focus: Porcelain Slab Tiles; Orkay's Response to Premium India

Porcelain Slab Tiles can be regarded as the highest value line among all products offered by Orkay, and is one of the hottest categories for dealers currently.

Orkay makes Porcelain Slab Tiles in sizes up to 1200 x 2400 mm. These tiles do away with the need for grouts completely, thus offering a completely smooth and continuous look desired by architects as well as luxury project developers.

These tiles are made out of high-density porcelain material and hence have very little water absorption capacity, extremely good compressive strength, and high resistance to scratches and stains. Our tiles are available in marble, concrete, and abstract designs to meet the requirements of your premium clientele.

For dealers, dealing in Porcelain Slab Tiles means entering into a lucrative business of large-scale orders from valued clients.

Conclusion

Orkay Tiles is more than just a tile manufacturer in Morbi. We are a company with 28 years of experience in manufacturing tiles using the latest technology, quality control, and a profound knowledge of what retailers and dealers require to make their tile business flourish. From our manufacturing facility in Morbi to your showroom, every Orkay tile comes with that promise.

Join hands with a manufacturer that your customers will be grateful for.
